Professional Summary

Front-End Developer with 8+ years of experience building responsive, pixel-perfect web and mobile applications using React and TypeScript. Proven ability to collaborate with UX/UI designers, integrate RESTful APIs, and manage state at scale with Redux. Experienced across both React Web and React Native environments, with a strong focus on clean, maintainable code, performance optimization, and cross-browser compatibility. Comfortable in agile teams and remote-first workflows.

Work Experience

Senior Associate — Front-End Developer

PwC México | Guadalajara, Jalisco, México | Feb 2023 - Present

- Design and develop responsive React + TypeScript web interfaces for enterprise-grade platforms, collaborating closely with designers to deliver pixel-perfect UIs.
- Integrate RESTful APIs and manage complex application state across multiple data sources, including on-chain and off-chain blockchain data.
- Participate in code reviews, enforce TypeScript best practices, and maintain high standards for code quality and documentation.
- Work within agile workflows across cross-functional teams, communicating technical decisions clearly to both developers and non-technical stakeholders.

Full Stack Developer

Del Norte Distribution | Oxnard, California, United States | Jul 2022 - Oct 2022

- Built a fully responsive inventory management frontend with React and TypeScript, delivering a clean and intuitive UI for warehouse operators.
- Integrated RESTful backend APIs (Node.js, Express) for real-time stock synchronization and bulk data imports via Excel.
- Ensured cross-browser compatibility and consistent UI behavior across all major browsers.
- Collaborated with stakeholders to translate business requirements into functional, accessible interfaces.

Dev Lead

Setenal | Guadalajara, Jalisco, México | May 2022 - Oct 2022

- Led the frontend development of the SIAN EX tire management application using React Native, delivering a smooth, native-feeling mobile experience.
- Integrated Bluetooth-connected hardware scanners via React Native Native Modules, bridging native and JavaScript layers.
- Conducted code reviews, established frontend conventions, and mentored team members on React Native best practices.
- Coordinated with product stakeholders in an agile environment to deliver incremental releases on schedule.

Full Stack Developer

Channel Islands Warehouse | Oxnard, California, United States | Jun 2021 - Apr 2022

- Delivered a cross-platform inventory system with a React.js web app and a React Native mobile companion, sharing business logic across both platforms.
- Designed and implemented a responsive UI with real-time stock updates, order management, and goods receiving workflows.
- Reduced inventory processing time by ~88% (2 hours to 15 minutes daily) through UI-driven workflow automation.
- Consumed and integrated RESTful APIs throughout the app, handling async data flows with clean state management patterns.

Full Stack Developer

Control System | Lagos de Moreno, Jalisco, México | Dec 2020 - Jan 2022

- Developed the frontend of a GPS vehicle tracking web platform, integrating Google Maps API for real-time fleet visualization.
- Delivered a responsive, data-rich UI using Bootstrap, ensuring usability across device sizes.

- Consumed RESTful backend services built with Node.js and Express, handling authentication flows via Passport.js.

Full Stack Developer

Centro Óptico de Lagos | Lagos de Moreno, Jalisco, México | Feb 2021 - Jun 2021

- Built a responsive web application with a clean UI using Handlebars, CSS, and Bootstrap, improving information accessibility for staff.
- Delivered a consistent cross-browser experience and implemented authenticated user flows with Passport.js.

Education

Bachelor's Degree in Computer Systems Engineering

Tecnológico Superior de Jalisco | Lagos de Moreno, Jalisco, México | 2018 - 2022

- Relevant Coursework: Full Stack Web Development, Mobile Development with React Native, UI/UX Fundamentals, Software Engineering

Skills

- **Frontend:** React.js, React Native, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Bootstrap, Redux, React Router
- **APIs & State Management:** RESTful APIs, Redux, React Query, JWT, Zod
- **Tools & Workflow:** Git / GitHub, Vite, Webpack, Babel, Docker, ESLint, Agile / Scrum
- **Languages:** Spanish (Native), English (Professional — GESE Certified, Trinity College London)
- **Soft Skills:** Communication, Team Collaboration, Code Review, Problem-Solving, Remote Work

Certifications

- **GESE (Graded Examinations in Spoken English)** | United Languages - Trinity College London | Nov 2023
- **React.js Practical Course** | Platzi | Feb 2022
- **Next.js: Authentication** | Platzi | Feb 2022
- **Frontend Developer Practical Course** | Platzi | Dec 2021
- **React Router and Redux** | Platzi | Jun 2021
- **ECMAScript 6+ (ES6 to ES13)** | Platzi | Jul 2020
- **Asynchronicity with JavaScript** | Platzi | Jul 2020

Projects

React Native Speed Art

Component design library for React Native with customizable, reusable UI elements and utility classes. Demo features a restaurant menu built with a modern, minimal design. Showcases component architecture, theming, and layout patterns. [GitHub](#)

React-APIRest-Template

Full-stack monorepo with a React + TypeScript + Vite frontend and a Node.js + Express backend. Frontend includes custom hooks, Bootstrap 5, and route-protected pages. Backend features JWT authentication, Zod schema validation, and RESTful CRUD endpoints. [GitHub](#)

BoxBook

Feature-rich virtual book catalog built with React and Next.js. Users manage a personal library with reading status tracking, ratings, reviews, progress monitoring, and a social friend system. Demonstrates complex state management and multi-page React architecture. [GitHub](#)

Mintel

Fully responsive marketing landing page for a smart home app, built with React and Bootstrap. Pixel-perfect layout across mobile, tablet, and desktop viewports. [GitHub](#) | [Live Demo](#)
