Guadalajara, Jalisco, Mexico (Remote) | LinkedIn: [linkedin.com/in/franciscoveloz](https://www.linkedin.com/in/franciscoveloz) | GitHub: [github.com/FranciscoVeloz1](https://github.com/FranciscoVeloz1)

## Professional Summary

Front-End Developer with 5+ years of professional experience building responsive, high-performance web and mobile applications using React, TypeScript, and modern UI frameworks. Experienced in both React Web and React Native environments, delivering pixel-perfect interfaces integrated with RESTful APIs. Strong communicator with a track record of collaborating in agile teams, leading code reviews, and shipping clean, maintainable, and well-documented frontend code.

## Work Experience

### Senior Associate — Front-End Developer

**PwC Mexico** | Remote, Guadalajara, Mexico | Feb 2023 - Present

- Develop and maintain React web applications using TypeScript, delivering responsive and accessible user interfaces for blockchain-integrated platforms
- Collaborate with UX/UI designers and cross-functional teams to translate design specifications into pixel-perfect, performant components
- Write clean, well-documented frontend code following agile development processes including code reviews, sprint planning, and retrospectives
- Ensure cross-browser compatibility and performance optimization across data-driven interfaces built with React, TypeScript, and Next.js

### Full Stack Developer (Frontend-Focused)

**Del Norte Distribution** | Remote, Oxnard, California, United States | Jul 2022 - Oct 2022

- Built responsive React and TypeScript interfaces for an inventory management application handling product orders, real-time stock synchronization, and bulk data imports
- Designed reusable UI components with Bootstrap ensuring consistent styling and cross-browser compatibility
- Integrated frontend with RESTful backend APIs, managing application state for real-time data updates

### Dev Lead

**Setenal** | Guadalajara, Jalisco, Mexico | May 2022 - Oct 2022

- Led a development team in building the SIAN EX tire management application using React Native and Native Modules
- Translated complex UX requirements into intuitive mobile interfaces with Bluetooth scanner integration
- Conducted code reviews, enforced coding standards, and coordinated agile sprints to deliver on schedule

### Full Stack Developer (Frontend-Focused)

**Channel Islands Warehouse** | Remote, Oxnard, California, United States | Jun 2021 - Apr 2022

- Delivered a cross-platform inventory system building both the React.js web application and a React Native mobile companion app
- Developed responsive, user-friendly interfaces with Bootstrap enabling real-time stock updates and order management
- Automated manual workflows through frontend-driven process improvements, cutting daily processing time by ~88%
- Consumed and integrated RESTful APIs for seamless data flow between frontend and backend services

### Front-End Developer

**Control System** | Lagos de Moreno, Jalisco, Mexico | Dec 2020 - Jan 2022

- Developed responsive UI for a GPS vehicle tracking platform with real-time geospatial data rendering via Google Maps
- Built accessible, cross-browser compatible interfaces using HTML, CSS, Bootstrap, and JavaScript
- Integrated RESTful APIs to display live fleet monitoring data with state management for dynamic updates

## Skills

---

- **Core:** React, TypeScript, JavaScript, HTML, CSS, SASS
  - **Frameworks:** Next.js, React Native, Bootstrap, Vite
  - **State Management:** Redux, React Hooks, Context API
  - **UI Patterns:** Responsive Design, Accessibility (a11y), Cross-Browser Compatibility, Pixel-Perfect Implementation
  - **APIs:** RESTful API Integration, JWT Authentication
  - **Tools:** Git, GitHub, Agile/Scrum, Code Reviews, Docker, Webpack
- 

## Certifications

---

- **Next.js Authentication** | Platzi | Feb 2022
  - **React.js Practical** | Platzi | Feb 2022
  - **React Router and Redux** | Platzi | Jun 2021
  - **ECMAScript 6+** | Platzi | Jul 2020
- 

## Projects

---

### React-APIRest-Template

Full-stack monorepo template with a React and TypeScript frontend powered by Vite. Features reusable UI components with Bootstrap, custom hooks for state management, and integration with a RESTful API backend with JWT authentication and Zod validations.

### BoxBook

Virtual book catalog built with Next.js and React. Responsive, interactive UI enabling users to manage reading catalogs, track progress, rate and review books, and connect with other readers through a social friend system.
