Professional Summary

Results-driven Full Stack Developer and Data Engineer with over 8 years of experience in software development. Proven track record in building scalable web platforms integrated with blockchain and AI-powered solutions. Skilled in React.js, Node.js, and TypeScript, with deep expertise in data pipeline design and cross-platform mobile development. Seeking to leverage full-stack and data engineering expertise to contribute to innovative, high-impact technology organizations.

Work Experience

Senior Associate — Software Developer, Data Engineer, AI Engineer

PwC México | Guadalajara, Jalisco, México | Feb 2023 - Present

- Build and maintain scalable web platforms integrated with blockchain, processing on-chain and off-chain data for enterprise clients.
- Design and implement secure data pipelines using Delta Lake architecture (Bronze, Silver, Gold layers) in Databricks.
- Develop intelligent applications powered by AI agents (Cursor, Claude Code), delivering data-driven, decentralized solutions.
- Act as Software Developer, Data Engineer, and AI Engineer across cross-functional teams in a consulting environment.

Full Stack Developer

Del Norte Distribution | Oxnard, California, United States | Jul 2022 - Oct 2022

- Developed a full-stack inventory management application for product order processing and real-time stock synchronization.
- Implemented bulk goods intake via Excel imports, reducing manual data entry effort across warehouse operations.
- Built frontend with React and TypeScript using Bootstrap; backend with Node.js, Express, and MySQL.
- Deployed application to DigitalOcean using PM2 and Nginx, ensuring stable production availability.

Dev Lead

Setenal | Guadalajara, Jalisco, México | May 2022 - Oct 2022

- Led a development team in creating a new version of SIAN EX, a tire management application for efficient inspections.
- Implemented Bluetooth-connected scanner integration using React Native and Native Modules.
- Coordinated planning, code reviews, and delivery milestones, ensuring on-time feature releases.
- Designed the cross-platform mobile architecture to support field technicians with minimal latency.

Full Stack Developer

Channel Islands Warehouse | Oxnard, California, United States | Jun 2021 - Apr 2022

- Delivered a cross-platform inventory system (web + mobile) with real-time stock updates, order management, and goods receiving.
- Reduced inventory processing time by ~88%, cutting daily manual workflows from 2 hours to 15 minutes.
- Built frontend with React.js and Bootstrap; backend with Node.js and Express; mobile app with React Native.
- Collaborated directly with warehouse stakeholders to gather requirements and validate feature delivery.

Full Stack Developer

Control System | Lagos de Moreno, Jalisco, México | Dec 2020 - Jan 2022

- Spearheaded end-to-end architecture and development of a GPS vehicle tracking web platform for real-time fleet monitoring.
- Integrated Google Maps API for live geospatial data visualization across the fleet dashboard.
- Built backend with Node.js, Express, and MySQL; implemented authentication via Passport.js.
- Delivered responsive frontend using Handlebars templates and Bootstrap.

Full Stack Developer

Centro Óptico de Lagos | Lagos de Moreno, Jalisco, México | Feb 2021 - Jun 2021

- Developed a server-side rendering web application to improve information control and operational workflows.
- Implemented secure user authentication using Passport.js and built a MySQL-backed data layer with Node.js and Express.
- Delivered a clean, responsive UI using Handlebars, CSS, and Bootstrap.

Industrial Electromechanical Technician

Nestlé | Lagos de Moreno, Jalisco, México | Dec 2016 - Nov 2018

- Completed comprehensive dual training in control systems, industrial maintenance, welding, and automation.
- Earned certifications in Power Transmission (EC0638), Equipment Alignment (ECE112-13), and SKF Seals.
- Supported maintenance and reliability operations in a large-scale food manufacturing environment.

Web Developer

Kodomi | Lagos de Moreno, Jalisco, México | Aug 2017 - Dec 2017

- Created a user-friendly website enabling customers to browse store merchandise and contact the company directly.
- Built with HAML, SASS, Bootstrap, jQuery, and JavaScript.

Robotics Designer

Fnatic Robotics | Lagos de Moreno, Jalisco, México | Apr 2016 - May 2017

- Designed competitive robotics systems using Autodesk Inventor for VEX Robotics tournaments.
- Achieved 7th place at VEX Robotics World Championship 2016–2017 among 100+ international teams.
- Won national titles in State Excellence, Design Pre-National, Programming Skill, Driver Skill, and Robotics National Champion.

Education

Self-Taught Software Developer

Independent Study & Online Learning | México | 2017 - Present

- Relevant Coursework: Full Stack Web Development, Data Engineering, Mobile Development with React Native, AI and Blockchain Integration

Skills

- **Technical Skills:** React.js, React Native, Next.js, Node.js, Express.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Bootstrap, Redux, MySQL, Delta Lake, FastAPI, Python, Passport.js, JWT
- **Tools and Platforms:** Git / GitHub, Docker, DigitalOcean, PM2, Nginx, Databricks, Vite, Webpack, Babel, Google Maps API, Autodesk Inventor
- **Languages:** Spanish (Native), English (Professional)
- **Soft Skills:** Team Leadership, Project Management, Problem-Solving, System Architecture Design, Process Automation, Cross-functional Collaboration, Mentoring

Certifications

- **Databricks: Delta Lake Architecture** | Platzi | Jan 2025
 - **Project Management Fundamentals** | Platzi | Oct 2023
 - **Python: PIP and Virtual Environments** | Platzi | Oct 2023
 - **React.js Practical Course** | Platzi | Feb 2022
 - **Next.js: Authentication** | Platzi | Feb 2022
 - **Frontend Developer Practical Course** | Platzi | Dec 2021
 - **React Router and Redux** | Platzi | Jun 2021
 - **ECMAScript 6+ (ES6 to ES13)** | Platzi | Jul 2020
 - **Asynchronicity with JavaScript** | Platzi | Jul 2020
 - **Power Transmission (EC0638)** | Nestlé / CONOCER | 2017
 - **Equipment Alignment (ECE112-13)** | Nestlé / CONOCER | 2017
-

Projects

React Native Speed Art

Design library for React Native featuring customizable, reusable components and utility classes. Includes a demo restaurant menu showcasing a modern UI built with minimal code. Technologies: React Native. [GitHub](#)

React-APIRest-Template

Full-stack monorepo template with React, Node.js, and TypeScript. Backend: Express with JWT authentication, Zod validation, and CRUD operations. Frontend: React + Vite with Bootstrap 5, custom CSS, and custom hooks. Technologies: React, Node.js, TypeScript, Express, JWT, Zod. [GitHub](#)

BoxBook

Virtual book catalog where users can sign up, add books, track reading status (will read / reading / read), rate and review books, monitor reading progress, and add friends. Built with a custom Next.js dashboard template. Technologies: React, Next.js, JavaScript. [GitHub](#)

Mettaton Compiler

Custom language and compiler for Arduino focused on robotics programming. Features a full code editor with terminal, line category analysis, error count display, and Arduino target selection with compilation capability. Technologies: JavaScript, Node.js, Express. [GitHub](#)

Smart House

Web-controlled smart home system allowing users to manage lights, fan, and water across multiple rooms from a smartphone. Displays real-time sensor data: temperature, gas level, and light levels. Technologies: JavaScript, Node.js. [GitHub](#)

Mintel

Fully responsive landing page for a smart home application, showcasing principal features, pricing, and advantages with clear, accessible information. Technologies: React, Bootstrap, JavaScript. [GitHub](#) | [Demo](#)

Additional Information

- **Interests:** Robotics, AI and Blockchain, Open Source Development, YouTube Tech Content Creation
- **Publications:** YouTube Channel — Software Development Tutorials (youtube.com/channel/UC_OcxydUU_51oT8mbcedriw)
